Commissioners.

I would like to add my voice to those upset that ratepayers with a 1" meter pay more for their water than those with a 3/4" meter. The cost for AAWC to provide service is the same irrespective of the meter size. Why should those of use in Anthem who have fire sprinkler systems pay more for our water when the additional cost to AAWC to provide the service is ZERO?

I am 80 years old and have been retired for 15 years. During that period we have had to put up with inflation which chips away at your fixed income in an incipient manor.

This water bill increase is not incipient - it is a 77% increase of which we were not forewarned at the time we purchased our home in Anthem. Had we been aware it might have affected our decision to buy here.

We came from La Quinta, California where we paid \$18. a month for water and sewer. Here we are paying \$120.00 a month which in itself is ridiculous, but raising it another 77% is outrageous.

There must be another better answer.

Subject: Anthem Water Rate Increase

Dear Commissioner Mayes:

I am writing to express my concerns regarding the pending Arizona American Water rate increases in Anthem. I am a Realtor and have bought and sold properties all over the Metro Phoenix area for years. Because of the pending litigation with Pulte and rate increases with AAWC it has made it almost impossible to sell property in the East Anthem area, especially the Country Club where we reside.

My husband and I are getting ready to retire within the next 12 months and will be placing our own home on the market this coming week, knowing that in this depressed market it will take many months to sell and with the litigation and water issue now hanging over this community might be impossible. You have to live in this situation to gain the full impact that all this has on families already struggling trying to make ends meet and survive this economy and not seeing an end in sight. Then on top of all this, uncertain increases in Country Club dues, Council & HOA fees all because of the water issue.

After contacting AAWC to ask what our water bill would look like if their latest proposed rates were to go into effect.

Water bill (w/o taxes) for 4,000 gal using a 1-inch meter:

UTILITY COMPLAINT FORM

- Will be \$161.04.
- My current bill is \$90.82.
- Total percent increase: 77.3%.
- Total annual dollar increase: \$842.64
- Water increase: 91.3%
- Wastewater increase: 60.9%

This is only residential use and does not include any additional increase for HOA, Council or Country Club fees.

Commissioner Mayes, we would hope that when decision time comes you would look at the big picture of Anthem's survival. This increase in the amounts AAWC is requesting would cause, in an already struggling community just getting off the ground, repercussions that would last for years. We would hope that consolidation of all of AAWC service areas be seriously considered.

Thank you for your time and consideration in this matter.

Kindest regards,

Jon & Mary Lou Patterson

Subject: Correspondence in regards to Anthem, Arizona water rate increase case

In reference to the increase in Anthem water rates proposed by Arizona-American Water:

To the Arizona Corporation Commission,

The burden must be shifted toward a more fair compromise.

American Water, Arizona-American's parent company, is a publicly-traded corporation. I believe that its interest is primarily in making as much profit as it possibly can in order to deliver the highest possible returns to its shareholders. I personally find it easy to infer that this may be its primary concern, and that the needs of its customers, and their own financial concerns, come secondary.

Now I'm not saying that there's anything wrong with being a profitable, publicly-traded company, but when residents of a particular community have no other choice but to subscribe to the only water system available, that a fair compromise must be made, because there is no other means for customers to secure the water that they need to operate their households. In this situation, customers have no choice but to shoulder the burdens that the investment strategies or decisions their corporate water supplier has chosen to make, however wise or unwise those decisions may have been.

I feel one of the major components of this case that must be considered in the decision-making is that it has been said by some that, when purchasing a home in Anthem, the details behind the ways under which the water

UTILITY COMPLAINT FORM

system had been financed had not been disclosed at the time of purchase. Furthermore, I feel that financial decisions such as this are the responsibility of the water utility to plan for in a more prudent way - not one where a profitable company proposes nearly 100% rate increases, who, according to its latest public earnings report, is exceeding 2009 levels in net income by a healthy margin, and seems to be turning very healthy profits during the worst economic times in decades.

To me, that is the most important factor to consider: Should a highly profitable, large corporation be granted the go ahead to implement a nearly 100% rate increase, which I feel may further add comfort and ease to their already healthy margins, at the expense of the thousands of residential and hundreds of small and local businesses who are already struggling to make ends meet? Is it fair to expect them to shoulder the burdens of infrastructure financing decisions that were made without their input or that were totally beyond their control?

In my opinion, a more fair-minded solution should be in order. I would guess that American Water knew what they were getting into when they purchased the Anthem infrastructure. In my opinion, they should have been ready to absorb a bit of shock in the cost of the infrastructure - a cost which is their responsibility to manage in an appropriate method. I do not feel that passing an almost 100% rate increase on to its customers is the appropriate method.

Yes, this may make it easy for the water company to continue to have healthy profit margins and continue delivering good returns for its shareholders, but is that what's most important in this matter?

Is it fair to force already struggling families and residents, who have no other choice in water delivery systems, to have to cut their already stretched budgets to pay more for water, so that an already thriving company can continue to thrive, without an equal sacrifice made by it?

I feel the bottom line is this, just as so many families have had to make sacrifices in this down economy to make ends meet - many to the brink of losing their homes, depleting their savings, or going into debt - so too must this corporation make sacrifices.

I have seen that some estimate this increase may tack on an additional \$70 - 80 per month on to an existing average bill of \$85. This could mean that many families might be forced to forego other important necessities that they can no longer afford, because they might have to suddenly pay that money toward their water bill instead, which is a necessity that no one can forego. Water is life, and it is a basic human right.

Furthermore, if water bills in the area double, some to the point of being prohibitively expensive, then it could also make it much more difficult than it already is for homeowners who are trying to sell their houses. Prospective residents may pass up houses in this area because they know how much the water bills are. Additionally, it could dissuade prospective businesses from deciding to locate in Anthem, because it would make their cost of operating, especially for restaurants and those who have to use a lot of water, much higher than other locations. This is not-to-mention the existing businesses who are just hanging by a thread in these tough economic times who may have to close up shop, because their water bills have pushed them over the brink. With so many vacant storefronts already in the Anthem area, this could make matters worse, and make it even harder to attract new businesses.

There are so many ways in which a rate hike of this sort could further damage an already struggling economy - these are just a few.

I feel that the Arizona Corporation Commission must take these issues and concerns into mind when considering such a substantial rate hike. They must look at the needs of the community, its residents, and their financial situations as well. I feel that, if looked at creatively, the water company could come up with many other solutions that would not affect their customers so much, rather than passing the burden on directly to their customers.

This burden must be shifted toward something that is more fair and takes into full account the needs and the

UTILITY COMPLAINT FORM

reality of the residents and business owners who have no choice in the matter but to subscribe to these water services.

As an Anthem resident, I appreciate your consideration.

Sincerely,

Jason Brommel Anthem, AZ *End of Complaint*

Subject: Pending Arizona American Water Rate Hike

Dear Chairwoman Mayes and Commissioners Kennedy, Newman, Pierce and Stump:

RE: Pending Arizona American Water Rate Hike

When I moved to Anthem in December 1999 I envisioned it as a great master-planned community that would attract buyers for many years into the future. Now Anthem is in danger of becoming one of the undesirable communities in the Phoenix area to live.

It appears that efforts are being made to establish an appalling rate increase so Arizona American Water can make the early payback of the loan originally set-up between Del Webb (Pulte) and Citizens Water (now owned by American Water). Instead, I believe American has reasonable options to utilize the nationally accepted standard of financing water infrastructure over a 35 or 40 year time frame. I understand that American Water is a national company that is currently profitable and paying dividends, so the need to adopt this accelerated payment schedule is unreasonable. Also, once the infrastructure loan is repaid, what guarantees do the Anthem residents have that our water rates will be returned to normal/legitimate rates?

UTILITY COMPLAINT FORM

My current water bill is already \$110 a month. A 77% increase to my water bill, plus the trickle-down additions to my HOA dues and social club dues will add another \$100+ to my monthly budget. Like many Americans my financial situation has also taken a turn for the worse. When I moved to Anthem I was married and enjoying a dual income. I am now divorced, living on one-half the income I used to have. The divorce decree gave me possession of the house, and all the bills, while I tried to sell. My house was on the market for over 3-years. After many price reductions and no offers, I have given up while I wait for any signs of economic recovery. As I approach retirement, selling a home I can no longer afford is imperative. If Arizona American Water is allowed to enact their proposed rate hikes I'm not sure how I will be able to market my house once I disclose my utility bills.

Please do not allow Arizona American Water to enact their proposed water rates. While the short term increase will be difficult; the long term damage to the reputation of the community and resale potential of the homes will be a disaster.

Sincerely, Barbara Krebaum

AHUICHI, ME OUCCO

Dear: Arizona Corporation Commissioners.

From: Jim Doering 4

Anthem AZ 85086

I recently moved to Arizona from the Kansas City Area, this past December, so I'm a new Anthem Resident. I have also lived in Salt Lake City and Portland Oregon. I am writing to you to help us with our Water Rates and the proposed recommendation to increase the rates significantly. I work as a Middle Manager with a large trucking company. I was kind of shocked to learn of such a high proposed rate increase for water. I understand all Corporations in America must make money. I work everyday to insure my company is profitable. However, I would position to you that rate increases, such as the one proposed in Anthem, would never be a successful tactic in our Trucking Business. Customer would leave.

With the poor economy, increasing water rates substantially would have a huge negative impact on my monthly personal budget, and would certainly create some difficulties with a normal Arizona lifestyle of natural landscapes in well maintained neighborhoods, such as Anthem.

Please understand that writing a letter to you isn't being done because I don't care about Corporations. I do, however, reasonable increases is what I would ask the Commission to recommend. Reasonable could be

UTILITY COMPLAINT FORM

consider no rate increase up to 10%. Anything more than 10% would be devastating and would have a trickle down effect to many things that Anthem as to offer.

Thanks for for your consideration.

Respectfully, Jim Doering *End of Complaint*

Subject: Anthem Water Rate Increase

Are there no reasonable controls on the outrageous increase proposed by the Arizona American Water Company on the homeowners and business entities in Anthem? Surely, your committee understands the negative impact this action will have on this community in the worst economy we have seen in decades. This action will negatively effect the Anthem economy, home values and overall viability of the community for many years.

In over 30 years as a homeowner in several states (and always in new housing developments), I have never encountered any utility (public or privately owned) that didn't amortize infrastructure costs over 20 or more years. Why would your committee consider the short term business and profit interests of American Water over the fair treatment of Anthem homeowners? Should we be forced to carry the burden of bad business decisions made by American water? As a homeowner in Anthem since 2004, this is only issue that makes me question my decision to buy a home here.

Please do the right thing and protect Anthem from the outrageous price increase that Arizona American Water is proposing to levy.

Thank you for reading and considering our position.

Subject: Anthem Water Rate Case

I am a retiree living in Anthem on a fixed income. The proposed water rate increase by Arizona American Water Company (AAWC) will have a huge impact on our budget. Something will have to give, whether it is our church donations or our monthly dinner out or perhaps an 82 degree thermostat setting vs. 78 in the summer. In short, our lifestyle will suffer.

I guess I'm old school but I thought that a business and its stockholders provided the capital for investments in new business and then recouped that investment over the long haul through operating profits. It appears to me that AAWC wants the ratepayers to buy them the plant so they can then profit by providing water and sewer service to us. AAWC wants the plant paid for in a short time frame which will adversely effect the lifestyle of most Anthem residents. I'd be willing to bet that once the payments to Pulte/Del Webb for the plant are complete we will never see a rate decrease.

If AAWC and it's parent company are not willing to make the investment for the long haul I would suggest that portion of our payments to AAWC earmarked to pay for the plant should be used to purchase shares of AAWC's parent company for the ratepayers making those payments. If we are buying the plant for AAWC, we should share in the ownership.

We need your help. I never thought I'd be paying more for water and sewer than for electricity in Arizona.

UTILITY COMPLAINT FORM

Subject: Proposed Water Rate Increase for Anthem Residents and Businesses

Arizona Corporation Commissioners.

This letter is to implore you to listen to the residents and business owners that live in Anthem with reference to their hardships if the proposed water rate increase is approved. Arizona American Water Company is a multimillion dollar corporation with yearly profits. The residents and business owners in Anthem are people that have chosen to live and work in Anthem but, in this economy, are struggling to pay their bills and keep afloat each month. This rate increase could and would be detrimental to many of the Anthem residents and businesses, and many may not be able to continue to stay. That would be a shame, because we have such a beautiful family community here.

My husband and I have lived in Anthem for almost four years. We are both retired and live on social security. At the time we bought in Anthem, the price of our home cost us 50% more than what we could sell it for today. At the time we bought our home, we were never informed about the high water and sewer costs and that the costs would continue to rise. We are continually faced with increased costs for gasoline, utilities, new sales tax and food tax, food, etc., as are everyone else, but when you are on a fixed income, every increase is harder to absorb. We try to manage our money, but with all the increases, it is becoming a challenge. If this increase is approved, not only will we have to pay the additional water/sewer bill, but our HOA fees and our community fees

UTILITY COMPLAINT FORM

will also increase. Unfortunately, the local businesses, that we try to support, will also have to pass on their large increase to their customers. We, unfortunately, will be hit from all ends. Because we live in the country club, we have a 1" meter coming into our home. The basic water and sewer fee for this 1" meter is \$70.64 per month, before we use one drop of water. It is my understanding that if this increase is approved, that the 77% increase will also be on this large basic service fee. We have been told that residents with a 3/4" meter pay much less for their service fees. Unfortunately, all the residents in the country club have the 1" meter. The country club residents are paying a larger water/sewer bill each month than other residents.

On December 15, 2009, the Anthem Community Council Board of Directors meeting was held where Paul Townsley, Arizona American Water president, made a presentation on the company's history. After that meeting, an article was published in The Foothill Focus on December 23, 2009 entitled "Water Rates Discussed at Anthem." The Managing Editor, Marc Buckhout, reported in his article the following: Another topic of confusion is the different rate structure for homes with .75 inch meter water pipes as opposed to those with 1 inch meter pipes. "There is a higher rate for those with 1-inch because the presumption is they are from larger homes and will have a higher demand on the system," Townsley said. If that's problematic, Townsley said AAW would be willing to work with the Anthem Council's Utilities Committee on a proposal to unify the rates regardless of the size of a home's water pipes.

That was last December, and nothing has been done to unify the rates. We are still paying the very high 1 inch meter fees. We do not have a large home -- our home is 2600 sq.ft. We usually consume around 4,000 gallons or less per month.

Not only will this increase definitely put a huge financial burden on us, but it will make the difference for several of our neighbors and friends in Anthem on whether they can continue to afford to live in our Anthem community. This increase is wrong and it is greedy on the part of the Arizona Water Association. Please do not approve their rate hike.

Thank you for your consideration on this extremely important and crucial issue to all Anthem residents and businesses.

Ron & Jackie Skaer

Subject: Water Rate Issues

Dear Commissioners:

I am writing to you as a resident of Anthem Country Club. I am writing to express my concerns about the actions being considered with our water rates.

As I understand it, Del Web and American Water made an agreement for which Del Web had a right to be reimbursed for the water infrastructure costs incurred in building out Anthem. American Water had agreed to this deal. There was an estimated amount of risk American Water, as a company, had to calculate when making this deal as the timing of the reimbursement was uncertain (based on certain build out and vacancy statistics). Unfortunately for American Water, the timing came earlier than expected, and now they have had to put out more of an expense, I am sure at an inopportune time, than they expected.

However, if they wanted to spread this risk, the time for them to do this was during the building phase. There is no where in our purchase agreements that indicates we, the residents, would have to be the bearer of their poor business decisions.

In a time where we have all had to make sacrifices, they are trying to off THEIR accountability and responsibility to the residents of Anthem.

UTILITY COMPLAINT FORM

We -- my specific family - has lost over 35% of our income, our house has depreciated by 35% (fortunately we are still above water), we have had to cut out eating out, vacations, and basically any extra expenses. We have had to continually cut back our expenses of things people take for granted, gas for cars, food for the house, activities for our kids. We have done so because it is our RESPONSIBILITY. There is no one to bail us out.

If the Council chooses to proceed with this rate action it will come close to doubling our water bill and increase our Anthem dues (due to their passing on their rising costs). In percentage terms, after all of our income loss and expense cuts, this water increase will increase our budget by 6% on a monthly basis. As we have already come close to cutting to the bone, I don't know where we will find this further expense. And although we can cut back some usage, water is a key need for daily life.

As we have taken responsibility for ourselves, it is time that Corporations, including American Water, take responsibility for their unfortunate business decisions. They are accountable for the deal they cut with Del Webb. They need to owe up to it.

Sincerely Marcy Oelhafen

Subject: Regarding increase in water rates

Hello.

I bought a house in the Anthem Country Club area one year ago. Never was it indicated that there were water issues with rates potentially doubling. We are in Anthem only part of the year and are currently charged at least \$90 a month whether we use any water or not. With the possible increase we could be paying \$200 per month. This would make our utilities difficult to manage. We are retired and bought the house in a short sale. The increase in rates will make the utilities unmanageable and the resale of the house impossible due to the increase in utilities.

We need to have the cost spread out over a larger group of people served by Arizona American Water and not have our area charged to the point that it's unrealistic for the average person to live there. The cost of the fees for the country club and Anthem Community Center will rise. The area will suffer greatly and most of us will not be able to maintain our residences.

Please keep in mind that this large corporation did not inform us of these issues and we bought our home. This was kept from people buying into the area and now we are informed that these of huge increases. This is not fair and I hope as an elected board member that you will understand this situation and work to prevent this doubling of our service costs.

Subject: Anthem Water Rate Increase

Importance: High

Good Day,

We are residents who live in the Anthem community, on the country club side. The water rate hike requested by Arizona Water is above and beyond a feasible rate for home owners. When we moved in here, we only thought to ask about the availability of water, never suspecting our water rates would be triple those of Phoenix Water. We are paying approximately \$138.00 per month which does not include waste pick up. At Desert Ridge our water was \$42 per month and included trash pick up.

The rates out here are entirely exorbitant and unreasonable. This will greatly affect selling our home to anyone who is intelligent, unless they are very well off. Most people these days with this economy are just getting by. An increase in the water rate would mean \$200+ per month. I don't know how young families can afford this. These rates will ruin this community as people shy away from buying here.

I believe we need a rate decrease instead of a rate hike!! Arizona Water is doing okay and if they are not perhaps they should go bankrupt, write off debt and sell out to someone else who can run this without a debt overhead. The only answer I have is that people in Anthem are middle class folks most of us - this isn't the Boulders or Desert Mountain, and water rates like this are out of range for many of us. I live with my husband, no kids and no pool and yet our water is \$138!!

UTILITY COMPLAINT FORM

We run the dishwasher once a week, wash clothes once a week, have no grass and no pool. These rates are totally exorbitant unreasonable! We should not be made to pay for a bad business deal between Pulte and Del Webb and Arizona Water!

Please review this letter and decide if you would want to pay this kind of water rate!

Subject: Anthem Water rate case

To whom it may concern

Please be advised that the rate increase proposal submitted by Arizona American Water will have a major impact on my standard of living, as a retiree with a limited income this increase will affect my ability to maintain living in Anthem and will force me to sell my home at not only currently depressed value, but an even further decrease that will be surely impacted in a major way if this increase is allowed to proceed.

It is inconceivable that a company can make a deal with a developer, which the home buyer was not be informed about, with the expectation that the rate increases will cover their cost immediately. They are called the "Arizona American Water Company" not the Anthem Water Company. When I was in the business world if I made a business decision that had a cost associated with it, it was born by the whole company not one community or buyer. To say that the cost of the infrastructure was not in the development cost, is just not justifiable, I ask you to protect the home owners and business owners in Anthem from this unfair attempt by AWC to extort money from the people of Anthem, they are a national company that makes millions of dollars a year, and if it was a bad decision they made then they not Anthem should have to pay for it.

Sincerely,

Barbara L. Spindel

Cc: Jerich, Jodi

Subject: Anthem Water Rate Case - Docket No. W-01303A-09-0343

Dear Commissioners,

The residents of Anthem urgently need your help. We had no representation at the previous water rate hearing because (1) the attorney allegedly representing Anthem was paid by Pulte and representing the interests of Pulte, not the Anthem residents, and (2) Pulte still controlled the Anthem Community Council. So we need for you to be extra ordinarily diligent at this rate hearing and even go back and review the previous rate case because of the lack of representation.

We received a huge water and wastewater increase approximately 2 years ago and now the Arizona American Water Company (AAWC) is requesting an approximate 80 percent increase on top of what was granted to them approximately 2 years ago. There will also probably be substantial increases in the Anthem Community Council dues and HOA dues if the proposed rates are approved.

There have been many foreclosures and short sales of homes in Anthem including some who are walking away from their homes because they are so far under water. There are many Anthem residents on a tight budget who are still underwater but have not yet walked away. Water rate increases of the magnitude being requested by AAWC could very well cause more foreclosures and short sales in Anthem.

UTILITY COMPLAINT FORM

As I understand the rate making process, the revenue requirement is determined mostly by three primary factors: (1) Rate Base, (2) Rate of Return, and (3) Operating Expenses. The only way to reduce the rate request is to reduce any or all of those three factors. Any other factors such as meter size, cost of effluent water, etc. simply shifts the cost from one AAWC Anthem customer to another AAWC Anthem customer. A brief discussion of each of those three factors follows.

RATE BASE:

I don't fully understand how the rate base is determined, but I feel certain that the balloon payments made by AAWC to Pulte would have a significant impact on the rate base. Based on information received from RUCO, AAWC has paid Del Webb/Pulte for Anthem a total of \$52,961,098 (\$36,237,175 for water and \$16,723,923 for sewer). A total of \$22,924,632 (\$14,480,136 for water and \$8,444,496 for sewer) has already been included in the rate base for Anthem. The current rate request includes a total of \$23,294,422 (\$17,037,608 for water and \$6,256,814 for sewer). AAWC has made a final payment of \$6,742,041 (\$4,719,429 for water and \$2,022,612 for sewer) which is not included in the current rate request.

I have lived in Anthem for over 10 years and find that most of the residents are reasonably intelligent people who would know to inquire about utility rates, including water rates, before buying a house. I am not aware of a single person who was told about the secret agreement between Del Webb/Pulte and the water utility company which would eventually result in the balloon payments by AAWC to Del Webb/Pulte prior to purchasing their home. Del Webb/Pulte and the water company were parties to the agreement, so they obviously knew about it. Apparently the Commissioners at that time and RUCO knew about the agreement. But the parties who were going to be hi-jacked by huge rate increases at a later date (the home buyers) were never told about the pending balloon payments until the 2008 rate hearing. Even then, the Anthem residents had no representation at the rate hearing because Pulte still controlled the Anthem Community Council and the attorney allegedly representing Anthem was paid by Pulte and actually representing the interests of Pulte, not the Anthem residents.

You, the current commissioners, have an opportunity to correct the egregious transgressions of common business ethics and honesty which have been inflicted on the Anthem residents. You can mitigate the hugely outrageous rate increases by (1) reviewing the previous rate increase and disallowing the balloon payments (\$22,924,632) made by AAWC to Del Webb/Pulte and (2) disallowing the balloon payments totaling \$23,294,422 made by AAWC to Del Webb/Pulte which is included in the current rate request. If there is some justifiable reason why you cannot do that, then the total amount of those payments should be spread out over the remaining life of the assets. Since this is the area of expertise for the Commission staff and RUCO, perhaps they may have other ideas for mitigating those hugely outrageous rate increases.

As I recall, the vote to include those balloon payments at the last rate hearing was three for and two against. Chairman Mayes (then Commissioner) was vehemently opposed to the unusual financial arrangement between AAWC and Pulte and worked diligently to discourage approval. I hope that she is still as passionate about her position this time as she was at the previous rate hearing, and that the other four commissioners will come to that same understanding.

RATE OF RETURN:

Stephen P. Puhr, an Anthem resident, has already provided to the Commissioners a detailed analysis for reducing the rate of return. His comments and recommendation were docketed on June 2, 2010 as reference number 112576.

OPERATING EXPENSES:

The Commission staff and RUCO have reviewed the expenses submitted by AAWC and made

UTILITY COMPLAINT FORM

recommendations for lowering those expenses. But there may be an opportunity for further review and reductions. Mr. Broderick at AAWC and I had an exchange of emails in early March this year, and Deborah Reagan at the Arizona Corporation Commission received copies of those emails. An extract from that exchange is as follows (my comments in black and Mr. Broderick's comments in red):

(2) I would expect that the Anthem water plant and equipment would be a separate and distinct "cost and profit center" within the overall structure of Arizona-American Water. Does Arizona-American Water have separate and independently audited financial statements which are specific to only the Anthem water plant and equipment? No. We have audited financial statements only for Arizona-American and that is partly why the Commission's rate case process is so time consuming as we essentially custom build financial statements for each district when we file a rate case using actual data that requires allocations and Commission Staff and RUCO essentially audit them. If so, are those financial statements available for review by the Anthem residents and the Arizona Corporation Commission? Yes. The equivalent of the district level financials is publicly available to you and was provided to the Commission when we filed the pending case. They are too large to attach to this reply, but let me know if you'd like a CD mailed to you. I believe Anthem is not a profit center in the sense you are using the term. It is a profit center to the extent required by the Commission's rate case process which determines as a component of your rates the allowed return on equity."

Since AAWC "custom builds" their financial statements, it seems to me that there is ample incentive and opportunity for AAWC to overstate their expenses in an effort to obtain higher rates from their Anthem customers. Commission staff and RUCO need to be extra ordinarily diligent in questioning expenses based on "custom built" financial statements. Even then, I don't understand how they can accurately audit "custom built" financial statements which require allocations submitted by AAWC.

CONCLUSION:

The residents of Anthem are pleading with you to correct the mistakes which have been made in the past and to establish fair and reasonable rates during the current hearing. Two major factors which should be reviewed are (1) lack of disclosure to the home buyers about the pending balloon payments, and (2) lack of representation for the Anthem residents at the previous rate case.

Lack of Disclosure:

It is my understanding that Del Webb/Pulte, AAWC and/or its predecessor utility company, RUCO, and the Arizona Corporation Commission all knew about the agreement for the balloon payments, but nobody bothered to tell the home buyers in Anthem before it came to their attention during the previous rate case. All four entities had the opportunity to inform the home buyers, and it would seem to me that common business ethics would dictate that such vital information should have been made available to potential buyers before they bought a house in Anthem. Apparently Del Webb/Pulte and the water utility company did not want to disclose that information because it would certainly make most people more hesitant to buy a house in Anthem.

However, both RUCO and the Arizona Corporation Commission (ACC) could have made that information available. The ACC has the responsibility to set fair and reasonable rates. I would think and hope that would apply to future rates to the extent that there is known information as well as current rates. However, I am not aware that the ACC made any effort to make that information known to potential home buyers. It seems to me that RUCO (Residential Utility Consumer Office) would have the responsibility to be a proactive advocate on behalf of the residential utility consumers. It would have been a simple matter for RUCO to prepare literature providing information about the pending balloon payments. However, I am not aware than RUCO made any effort to provide that information.

Lack of Representation:

The residents of Anthem had no representation at the previous water rate hearing because Pulte still controlled

UTILITY COMPLAINT FORM

the Anthem Community Council and the attorney allegedly representing Anthem was paid by Pulte and was actually representing the interests of Pulte, not the Anthem residents.

RECOMMENDATIONS:

The unusual (and undisclosed to home buyers on a timely basis) financial arrangement between AAWC and Pulte and/or their predecessors needs to be reviewed in its entirety. I think the vote at the previous rate hearing to include the balloon payments in the rate base was three for and two against. This time please make it five against including the balloon payments in the rate base.

The previous Anthem water rate case should be reviewed and the balloon payments totaling \$22,934,632 made by AAWC to Del Webb/Pulte should be removed from the rate base since the Anthem residents had no representation at that hearing.

The balloon payments made by AAWC to Del Webb/Pulte totaling \$23,294,422 included in the rate base for the current request should be removed.

If there is some justifiable reason why those balloon payments cannot be removed from the rate base, then the total amount of all balloon payments (\$52,961,098) should be spread out over the remaining life of the assets.

Since commission staff and RUCO are the experts, they may know of other ways to mitigate the impact of the balloon payments.

The Rate of Return should be lowered to the recommendation of Stephen Puhr as mentioned above.

The Commission staff and RUCO should do another diligent review of the expenses submitted by AAWC and remove any and all expenses which have not been thoroughly and completely substantiated with verifiable documentation.

AAWC should maintain accurate accounting information which is specific to each water district. This would eliminate the need for AAWC to "custom build financial statements for each district when we file a rate case using actual data that requires allocations."

Respectfully Submitted,

Lynn Vick, Retired Anthem, Arizona 85086 *End of Complaint*

Nature of Complaint:

From: Richard Tigges !

Sent: Monday, September 13, 2010 2:37 PM

To: Utilities Div - Mailbox Subject: Anthem water rates

Just a note to let you know how I feel about the Arizona American Water proposed rate increase for Anthem, Arizona.

]

First, the rate increase about 2-years ago should have never been granted.

The current request for a rate increase shows total disregard for their customers by Arizona American Water. Asking for any increase in this economy is shameful. The astronomical increase proposed by this company is an insult, not only to consumers, but to the Corporation Commission.

The current economy is such that homeowners are having a hard time holding on to their homes. A rate increase will only make a bad situation worse.

I think a study would show that the demographics for the Anthem community have changed considerably in the past few years. The turnover of homes in this area has been tremendous, and is continuing. People, like my wife and I, bought or are buying here because it is a nice community and housing prices are very low. We could never have afforded a home here, or anywhere in Phoenix, a few years ago. We are just average folks, not wealthy, hardly middle class. We live on a small fixed retirement income. Two of our neighbors are struggling to keep their homes. Another rate increase will put even more of us in a bad situation.

UTILITY COMPLAINT FORM

Granting an increase of any kind would be an injustice to the people in this community, adding to the injustice done two years ago.

The Arizona Constitution charges the ACC with ensuring that "just and reasonable rates" are charged by utilities.

Please see that justice is done, and the constitution is upheld.

I thank you for your time reading this, and for the difficult task you have before you.

Subject: Proposed Water Rate Increase in Anthem - HELP!!

Good Day!

We, as all homeowners in Anthem, will be significantly affected by the proposed water rate increase starting with our water bill which will be raised beyond what anyone could ever have imagined when we first purchased our home. Our HOA dues will go up because they will be impacted by the increase. Everything that we purchase here in Anthem will go up because those businesses will be affected by the water rate increase. It will produce a domino effect of a huge magnitude. We are now retired and on a fixed income. This proposed, outrageous increase was never entered into our budget because who would have thought that this would ever be something we would have to worry about? Certainly our home value will be obliterated. Who in their right mind would want to move into a community that has water bills that make it prohibitive to live? I truly believe that Anthem could turn into a ghost town because no one will be able to maintain their homes and businesses in this community. PLEASE put yourselves in our place and think about how devastating this water rate increase could be not only to us but to all the families that up to this point have been so happy to call Anthem home.

As you are well aware, Arizona American Water Company, is a huge, multimillion dollar corporation with profits each year. They can certainly afford to use other standard practices to ensure the return of their infrastructure investment. If they made poor business decisions, why should we have to pay for their mistakes?

I urge your very careful consideration of what this will mean to my family and to all residents of Anthem. Thank you, Susan Woods

Hello,

My name is Heather Zellers, and I live in the country club side of Anthem. This is just a brief, but very important request.

PLEASE do not increase our water bill by so much. Our bill is almost \$200 in the summer anyway, and we dont have a pool. I cant believe it is that high already, and to increase it would be outrageous. We have lost \$375,000 value on our house from when we bought, this would just drop the value of all of our homes so much. Thank you for reading this.

Subject: Water increase in Anthem

To whom it may concern,

I just wanted to express my concern over allowing the rates to be increased in Anthem. Things are already very tight in today's economy and an increase such as this would only burden the residents of Anthem even further. Even if we exclude the current dispute between all parties and the residents, an increase at this time just doesn't make sense. Please listen to the residents in the area when we say that a 50% increase in rates, even a 25% increase in rates is just not reasonable.

Thanks,

Travis & Shannon Hill

Subject: Water rate

Gentlemen:

Please don't single out Anthem by increasing the water rate to an un affordable amount, we are living on Social Security and it would be a tremendous burden if the rate doubled. Why not consolidate? That would be fair for all involved.

The increased rate would also bring down the value of my house which is already below what I paid for it.

Please consider the seniors and all the people out of work due this terrible economy. It makes me sick to think about this extremely high rate increase.

Jack Dose

Anthem resident

I find it hard to believe that the Corporate commission would raise water rates at a time like this in our economy. Not only would it put a hardship on families that can barely make ends meet but it would have far reaching consequences with regards to property values as well as the communities infrastructure. Please rethink your decision to raise water rates.

Subject: Water rates in Anthem

The proposed water rates for the Anthem area are not reasonable. We were not advised of this possibility when we purchased our home over five years ago. We do not agree with any rate that doubles our cost for water. This is not reasonable. We pay over \$100 a month for basic service, not to mention the dues for the Country Club, which are also affected by this increase. It would be different if we used an exorbitant amount of water, this is our basic cost. Your need to hear what we are saying here and do the right thing. We realize that water is very important but not to the extent that it causes people to think about leaving the area. Your action in our favor would also help our property values rather than making it difficult for us to survive the current economic condition. This is a chance for you to make a real difference in the lives of the people in the Anthem community. We trust that you will act to prevent any increase in our water rates.

Regards,

Norman Hamra

Dear Board or Commission.

I have followed and attended many of the meetings for this proposed rate increase. I have felt that the Commission has listened and responded very fairly to the comments and the history of Anthem with Del Webb and Pulte. What can be said at this point -> the proposed increase is unjustly and morally unfair as all the documents will support. The solution to combine several districts is the most fair and will keep the beautiful community of Anthem alive and would not jeopardize any other community. We all must live within our budgets and be above board with financial dealings.

Thank you for giving me the opportunity to participate in the rate increase hearings. Be Fair in your decision, Most Cordially, Linda Ellis

Dear Commissioners,

You have a major challenge facing you with regard to this decision. We appreciate your efforts to make your decision fair and equitable.

We built our home in Anthem in 2000 and still find it difficult to understand why the cost of the water infrastructure was not added to the price of the lots at that time. Unfortunately, that is an issue over which we have/had no control, yet we suffer the consequences going forward indefinitely.

We are not rate experts. The only thing we can do is ask you to consider a rate increase that is justifiable and fair. It is our opinion that the homeowners in Anthem have not been treated fairly, but we hope that we can put that label on your decision.

As retirees who must watch very carefully every expense, we have our concerns about any drastic increases and their effect on our ability to maintain our Arizona home.

Thank you for your consideration.

Sincerely,

Robert and Judith Stubblefield

Subject: Proposed Water Increase in Anthem, Arizona

Arizona Corporation Commissioners:

I am writing to you today to express my concerns with the Arizona American Water rate increase. My understanding is that this multi-million dollar corporation is working with the Commission to impose a 77% increase in our water bills. This increase would drastically affect my household budget. So much so that I would need to cut the kids' sporting activities and our donations we try to make each year at Boulder Creek High School and Diamond Canyon Elementary School. Or worse, it could blow our budget to the point we can no longer afford to live here in Anthem.

We are a family of five. We have two sons: Ty and Adam, both doing very well in school at Boulder Creek. They are active in sports and taking honors classes for college. My daughter, Sava, is a 7th grader at Diamond Canyon and is in Choir and an active member of the Musical Theater of Anthem. We have lived here in Anthem for 8 years now. We love our community and are very active within it. With this economic down-turn, it has been very straining on our finances. We have cut out just about everything we can in order to make ends meet while working hard to get back to the level we were once at. This rate increase would be a punch in the stomach to us, and one we may not be able to survive financially.

UTILITY COMPLAINT FORM

I ask you to reject the proposed increase. I've told you my personal story, but there are hundreds of other families here in Anthem that have very similar circumstances. Our community is hurting right now, and this increase would cause serious harm to our already strained community.

Regards,

Scott Elder

Concerned Anthem Resident

Subject: Anthem Water Rates

I am writing to express my concerns about the proposed water rate increase for Anthem. Our rates are currently much higher than those we were paying in Tucson.

For our specific situation, I have recently lost my job and rates going any higher than they already are would be quite punitive. Also, with the level of foreclosures in the area, I believe that the rates would make this area unattractive and more forecloses inevitable.

Please consider my situation when making your decision.

Thank you.

Respectfully,

Corine Cuvalier Lulis

To: Arizona Corporation Commissioners

Re: Rate increase will affect you and your family budget.

Please accept this email as our protest to the water rate increase to the Anthem Country Club. This increase will have a dramatic effect on our family budget, not only to our personal water bill, every organization and business in Anthem will be affected by this increase. Our quality of life will be affected in many levels around the community.

Please be reminded that our water company, Arizona American Water Company, is a multimillion dollar corporation with yearly profits and one that can afford to use other standard practices to secure their return of infrastructure investment.

Remember, in addition to your personal water bill, every organization and business in Anthem will be affected by this increase. Your budget will be affected in many levels around the community.

Please think about what this increase will do to our community... and remember, the Arizona Corporation Commissioners are elected to their seats by our votes.

Dear commissioners:

It is my understanding Arizona Water Co. wants to raise our rates to cover a very bad investment that they made. It is not acceptable

to pay more than the going rates around this valley. The up front costs are include in the price of the home and to pay for that twice is not fair. I also under stand this company is profitable. This deal will only devalue our property and upset a very nice community. Bailouts

have not worked in the past and will not work in the future. We are all getting strapped make the right and fair decision and deny the rate increase, please.

Sincerely Bruce & Gayle Perry new Anthem residents *End of Complaint*

Subject: Anthem-Water Rate Increase-Please Read

To whom it may concern,

This letter is being written in regard to the Anthem, Arizona water rate increase. As you all probably know, the economic melt down and real estate debacle has wreaked havoc on the Anthem community. Our property values have dropped by 50% or more and as a result, we have vacant, forclosed homes on every street. The community associations have had to make several rate increases in association dues to the current homeowners to make up for lost income of the distressed properties. As many of us have are going through financial hardships, a 77% rate increase on our water bills could very well put many residents over the edge. The average water bill of \$125.00 would be well upwards of \$200.00.

For those of us who are looking to sell our homes, this water rate will most definately discourage buyers from coming to Anthem and thus will negatively effect our property values. This is a family community and we CANNOT afford to swallow an increase of this magnitude.

The water company is a multi million/billion dollar comapny that can certainly take the financial hit better than the average middle class family. As a resident that will be tremendously affected, I implore you to STOP this rate hike. I myself know that my houshold and many others likewise will be forced to flee Anthem and cause further damage to the community as a result of the financial strain.

Please feel free to contact me with any questions or concerns. Thank you in advance for you attention to this matter.

UTILITY COMPLAINT FORM

Sincerely,

Pauline Thomas

Subject: Anthem Community 77% Water Increase

The proposed increase is unheard of in our modern society and I feel we have been scammed by Pulte and the Arizona Commission.

When we purchased our home in 2005, we were not notified of Pulte's outstanding debt. Neither were we advised by the Commission of such a possibility of incurring a future enormous debt. We live on a fixed income and simply cannot afford another increase in our monthly expenses. Both my wife and I both now have enormous out-of-pocket medical expenses in excess of \$1500/month that are NOT covered by insurance or Medicare. We have already cut out all living expenses we can. We do all of our own housekeeping, yard work, pool work, maintenance, etc.

My monthly water bills for the last four months have AVERAGED \$131/mo, which in and of itself is ridiculous. I know for a fact that homes in Phoenix do not pay this exhorbitant rate. Arizona American Water is a profitable company and can use other industry standards to pay for their infrastructure upgrades and investments.

As a voter, I'm counting on each of you to do the right thing. Do not increase our rates. If anything, they should be reduced to be on par with the rest of the state.

Sincerely,

Nelson & Phyllis Saunders

To: Utilities Div - Mailbox Subject: Water rates - Anthem

Don't know how you can justify huge rate increases in this economy. Please consider this carefully as it impacts a lot of families in a very difficult time.

Subject: 77% Water Rate Increase????

Are you all kidding? What business in these economic times is allowed a 77% rate increase. This is criminal. People are either without jobs or barely holding on to their jobs. As a small business owner that deals business to business, we are watching businesses go under at an alarming rate. When they go out of business we take a hit as well...there's your domino effect. We can't raise our prices 77% or we would be out of business, instead we take the cut and try to live with it unlike these large corporations that have us all over a barrel and are allowed by people like you to get away with it. If this goes through, just wait till the next election cycle, not only will you lose my vote, but I will personally make it known to everyone we come in contact with just how criminal and negligent you and your actions are. This increase would seriously impact our personal lives. Thank you for your time and consideration.

Sincerely, Terry & Peter Petrone *End of Complaint*

Subject: Please reject the Arizona American Water Rate Increase Proposal

Dear Commissioners.

Our family has had no increase in income for several years but deductions in the form of increased rates and taxes continue to diminish our lifestyle.

As residents of Anthem we were completely shocked to learn of the underhanded tactics employed by Del Webb Corporation/Pulte Homes to recover infrastructure costs of the water system. There "should be a law" that prevents this kind of deal-making while keeping the homeowner/buyer in the dark.

Please consider making this payback fair and affordable for the residents of Anthem and prevent our community from becoming an undesirable place to reside due to the cost of water.

To all,

Enough is enough !!!.. they tried to pull a fast one and got caught ... Do not raise our water rates 77% at a time when all of our asset values are going down .. that rate hike will KILL OUR CHANCES of ever selling our homes !!!! Which means more foreclosures, lower home values, etc .. then you will end up with NO usage in Anthem to pay for your plant up here ... I am getting sick and tired of the overall "Let's see how much we can gouge them and get away with" attitude of government, corporations, gas stations, etc ... time to turn back the clock to a more HONEST time in history where people (government included) did WHAT WAS RIGHT!! Any of you have any INTEGRITY and HONESTY left in your bones!!!!!

Subject: Anthem Water Rate Case - PLEASE Deny this Increase.

To: Arizona Corporation Commissioners

Chairwoman Mayes, Commissioners Kennedy, Newman, Pierce, Stump

RE: Anthem Water Rate Increase

Docket W-01303A-09-03-43, SW-01303A-09-03-43

As a new (less than 1 year) and unsuspecting property owner in Anthem, I am writing to you today to request your consideration in reviewing the proposed rate increase for Anthem residents and to deny this grossly unfair increase.

As Lee and I are approaching retirement age we started searching for a modest size home to fit our budget. We have always been conservative (some would even say to frugal) in our life style. We are ever mindful of doing our part to recycle and we truly value natural resources. We have never abused utilities and always look for ways to conserve (using rain barrels, solar lighting, turning back the temperature on the hot water tank and the furnace, etc.) After awhile you get used to taking lukewarm showers and putting on extra clothing in the winter months. When we purchased the home in Anthem, we were in the state of shock by the first water bill that we received; we immediately contacted the Water Department to inquire about reducing the 1" meter currently at the home to a ½" or ¾" meter to reduce water consumption. This was done after much research to determine that the fire sprinkler system would effectively function, but - only to be told by the Water Department, that they would require an extensive and expensive process (which I will not take up you time with details at this time) in order to change the meter. In other words, they did not want to make the process easy to allow us to reduce our water bill. We understand that companies are in business to make a profit, however, there is only "so much" to

UTILITY COMPLAINT FORM

go around - that being "natural resources" and/or money to live on. We have done all of these things because we believe that it is the right thing to do and also, so as to have enough money to retire without being a burden on our family or anyone else. Unfortunately, due to the state of the current economy and loss of jobs within our specific fields, we have been forced into retirement earlier than originally planned. While we were still hopeful that we would be able to manage, we have now been hit with the news of these exorbitant increases in water rates, which in turn will increase other fees due to the Homeowners Association, and it will also have a negative and drastic effect on the entire community property values as this area will no longer be a desirable and/or an affordable area in which to relocate.

How very sad that a utility company would be able to have such a negative impact on the lives of so many and be able to destroy such a lovely community by charging these outrageous fees.

Even after saving all of our lives, Lee and I will not be able to stay in Anthem if this rate increase is allowed and I fear we will suffer significant financial loss on the sale of our home, as I suspect this area will no longer be desirable, or affordable by many. Our once exciting and hopeful venture of retirement has turned into a nightmare. At our age, "time is against us" and we will not be able to recoup this type of a loss.

PLEASE do not allow the Water Department to have this huge increase in rates and penalize the "current" unsuspecting property owners that were never made aware of the situation that existed in this community. Please be fair in you assessment and allow Anthem to remain a viable area.

Sincerely -- Thanking you in advance for your time and consideration.

Subject: Increase in Anthem Water Rates

I am writing to express my strong concern about the proposed increase in rates by Arizona American Water. We are retired and on a fixed budget. I am not sure we would have moved to Anthem if this information had been properly disclosed. Not only would the increase dramatically impact our monthly rates, but also other costs for living in Anthem such as HOA and Country Club fees. I firmly believe that Arizona American Water and Pulte should both share in the burden of this rate hike since there should have been proper disclosures. It's not fair for others to pay for their failure to disclose or mismanagement in not counting the costs beforehand. As other utilities have small percentage increases, that might be appropriate for water also. However, this kind of a rate hike is just not fair to the community.

Moreover, I am very concerned about the people here in Anthem that are already struggling in this economy. There could be no worse time for this to happen. I see more people being forced into short sales or foreclosure because of this added expense. This will have a negative effect for Arizona American Water and the community overall.

My recommendation is to implement an equitable plan for everyone.

Thanks in advance for your consideration of this important matter to Anthem residents.

Don Morue

Subject: Anthem Water Rate Increase

Simply put, the proposed water rate increase by Arizona American Water is something that cannot happen to the residents of Anthem.

The current economy and high rate of foreclosures in that area are indicative of only a few of the many reasons a utility company like AAW, who post regularly high profits, should reconsider this increase.

I know many families, mine included, that would likely be driven from their homes with an increase of this magnitude.

As stated above, the utility company is more than capable of carrying this cost, and should look to find alternative methods for absorbing some, if not all of the infrastructure costs.

The agreement between Pulte and AAW was based on a build out date of Anthem. It came sooner than anticipated, and now the residence of this community are required to foot the bill for poor planning on the builder and especially the utility companies part? Simply put: NO. *End of Complaint*

Dear Sirs.

It's hard enough to be laid off of work and then to be proposing a rate hike for our water!!! Please consider "what justice" is this during these VERY hard times in our economy for all of us!

This outrageous increase will devastate many other families in our community..... not to mention small businesses just surviving now in Anthem.

It's very unjustified!!!!!

Subject: Anthem Water Rates

To AZ Corporate Commissioners:

The proposed water rate increase by American Water Co is way out of line. My financial position has suffered greatly due to the economy. While an approx. \$100 a month increase in the water bill may not hurt some, but to me and my family it would mean a great deal. It is just one more bill that has to be paid that takes away from other necessities. We have already given up so much. I've looked at the recent K-1 for American Water. Take a look at how much they pay their executives and tell me that they really need this kind of rate increase. What for to buy a corporate Jet? Please vote against any rate increases by American Water. This is not unlike our congress...keep spending money and then ask for more so they can spend more. Has American Water ever thought of cutting spending just like the rest of us do?. I wonder when the last time any executives at American Water took a pay cut. My income went down 80% over the last two years.!!!!!!!!!!!!

Subject: water rates

Mr and Ms. I am a resident of the Anthem Community and have lived there for 10 yrs. each and every month it seems my water bill is higher and higher, for 7 months of year I am hardly home and my water bill runs \$133.00 per month, when I am home in the winter months it is only me and my bills are even higher. I don't understand people in the Parkside devided have children and a full house all year long and their bill are less then mine, everything has been check for leaks, etc. why does the Country Club pay higher water rate the Parkside customers. I am ss and am not pleased about the increase. Ten years ago there were less people in Anthem and now our town in full, don't know why our rates have gone up when more and more people have moved into the area, I know there is more of demand for water but I think the payment each family is making should cover the cost. When will the utilities stop asking for rate increases, many of us are on fixed incomes and just know with each increase we will have to cut back on other things that are important to our lives.

Hope you can think about this increase carefully.

Subject: Increase in water rates for Anthem County Club

To Whom It May Concern:

I hope you will help the homeowners of Anthem regarding the unaffordable water rates being proposed. Our rates for the other utilities are much more affordable and we have found it difficult to understand how we could have such amazingly high base rates for water. We live in Minnesota and are accustomed to very low water rates, so it is shocking for us to see base water rates of about \$75 per month for zero water use. We hope, some day, to retire to sunny Arizona, but with water rates this high, we would find it difficult in retirement to afford such high water utilities.

In Minnesota we have been the victim of a sales tax that was meant to pay off our metro dome stadium. The dome has long since been paid off, but the tax has never been lifted. In addition, here in Minnesota, we have experienced a sharp decline in real estate values only to see our taxes increase. My home in Arizona has substantially decreased in value as well, but I am delighted to see Arizona lower my taxes commensurate with this lowered value. This is certainly the honest thing to do. Minnesota lowered my assessed value and then raised my taxes 25%. You can understand my concern that if our Arizona water rate is raised a great deal, that it will never realign and go back down. Here in Minnesota we find that once a higher rate is established, it is very difficult to get it back where it should be. Please do not let the water rate get raised to a point where we will all suffer for a very long time. I certainly have been pleasantly surprised to see how taxes are handled in Arizona

UTILITY COMPLAINT FORM

compared to Minnesota. I hope that you will help the thousands of homeowners to get affordable water rates when we already pay much higher rates that the homeowners of the Phoenix valley.

Thanks for your consideration,

Jim and Allison Gaasedelen

Subject: Anthem water rate increase

Chairwoman Maves.

Commissioners Kennedy, Newman, Pierce, and Stump,

I am a retired building tradesman living on a pension with my wife Patricia in Anthem. I worked thirty-eight long years in the building trades to earn my pension. We live on a fixed income now.

We just can not afford to have a water rate increase. Over the last two years our health insurance rates have been increased by almost five hundred dollars a month. Add that to all the other increases in this economy and it really cuts into our monthly budget. These were supposed to be the years that we could enjoy in our later years. It is not turning out that way.

If you allow this water rate increase it will increase our monthly payment by \$75 - \$100, along with an increase by the Anthem Community Council HOA, Anthem Country Club HOA, Anthem Golf and Country Club, and all of the small businesses here in Anthem. We will have to cut our spending here in town. It will be a catastrophe to shops and restaurants in our area. If all 10,000 homeowners did the same, this could turn our town into a virtual ahost town.

If you add all of the above to the fact that we were not aware of the water deal made by Dell Webb/Pulte with the water company when we purchased our home, it sure sounds like a rotten deal. If we were aware at the time of purchase that in a few years our water rates would DOUBLE,

we might have purchased a home elsewhere. I am sure that Dell Webb took that into account when they sold us our home. Another rotten deal!

Sincerely, Anthem resident Robert Kuchar *End of Complaint*

To: Water Commissioners:

I urge you to do the right thing and equalize the cost of water from town to town. I am on a fixed income and my water bill is now over \$200/month and I live alone, so imagine what it could become if the rate is increased again.

I am angry at Del Webb and the Water Company for making a deal without consulting or informing any potential buyer, when I purchased six years ago.

I deeply resent having to pay for a deal of which I nor my neighbors were a part. This is a bail out of two companies that made a bad deal and they should have to fix it amongst themselves, not ask for what is truly another taxpayer bailout.

Fairness needs to be equally spread across the board for like services.

Thank you, Lynn Glick

Resident of Anthem, Az.

Subject: AZ American Water Rates Case

If average water rates in Anthem exceed \$200/month, you would significantly cause harm to everyone in this community. There is no justification for it.

Subject: water rates

Mr and Ms. I am a resident of the Anthem Community and have lived there for 10 yrs. each and every month it seems my water bill is higher and higher, for 7 months of year I am hardly home and my water bill runs \$133.00 per month, when I am home in the winter months it is only me and my bills are even higher. I don't understand people in the Parkside devided have children and a full house all year long and their bill are less then mine, everything has been check for leaks, etc. why does the Country Club pay higher water rate the Parkside customers. I am ss and am not pleased about the increase. Ten years ago there were less people in Anthem and now our town in full, don't know why our rates have gone up when more and more people have moved into the area. I know there is more of demand for water but I think the payment each family is making should cover the cost. When will the utilities stop asking for rate increases, many of us are on fixed incomes and just know with each increase we will have to cut back on other things that are important to our lives.

Hope you can think about this increase carefully,

Vivian Angerami *End of Complaint*

To: Utilities Div - Mailbox Subject: water rates anthem

It is imperative that you be fair in the final decision when it comes to determining water rates in the Anthem community. I am just entering retirement and this increase will impact not only my water bill at my home but also the dues I pay to live in the Anthem community. There are other standard practices for the Arizona Water Company to secure the return on the infrastructure investment. Be fair. I have to live within my budget and the decisions I make so should the Arizona Water Company. Also rate sharing seems to be a reasonable soultion to this issue.

I wil do everything I can to support those of you on the commision to come to a fair and reasonable solution and the other hand if we in Anthem are forced to pay for a bad decision of the Arizona Water Company I will do what I can to remove those that supported that decision.

Be fair and reasonable.
